

# Rojan Rijal

## EXPERIENCE

### **HackerOne, San Francisco, CA — Security Analyst Consultant**

September 2016 - PRESENT

Worked as Security Analyst Consultant to manage security reports of various companies signed up with HackerOne. I was in the team to manage reports of multiple companies and government organizations.

### **T2BH, Fullerton, CA — Server Engineer**

January 2015 - PRESENT

I work at T2BH as a remote Server Engineer managing the backend of the application as well as deploying it to the live site. We utilize Meteor JS for the backend. I work in the AWS side to handle security of the bucket and general security to prevent other vulnerabilities.

### **STEMpowerment, Brea, CA— Website Designer**

October 2014 - June 2015

As a website designer I helped to design the website as well as work on SEO of the website. My work included managing the website and editing its content to suit the audience of the website.

## EDUCATION

### **Valencia High School, Placentia, CA — IB Diploma Candidate**

September 2013 - June 2017

## PROJECTS

### **WebSec CTF — Online Capture the Flag competition**

I manage a team of researchers who work with different sponsors to launch CTF programs for different countries. We successfully ran a CTF 6 months ago for Nepalese researchers. Season 2 of that CTF competition is set to run again with sponsorship from Cobalt.

## Programming Language

Java

PHP

Python.

## Honors & AWARDS

**Hack the Pentagon-** I was able to achieve 10th Place in the Hack the Pentagon pilot program.

**TEDx Talk** - I gave a TedX Talk regarding bug bounty, responsible disclosure and security of IoT.

**Future Business Leaders of America 3D Animation** - Me and my team got 2nd place in National competition where we showcased our 3D Animation regarding TSA PreCheck. We also made a presentation of the development process.

**Freelance experience** - I work to find vulnerabilities in my free time. I have been recognized by companies like Facebook, Uber, Yahoo, and many more. I also contribute to security of Open Source projects for example Oxwall.
